His bride-to-be is equally well known here, as her family were former residents of this city. The marriage will be celebrated in the Waldorf-Astoria Hotel.

Mr. Calhoun's daughter, who is a close friend of her prospective stepmother, was married last Thursday night to Mr. C. Norman Jones at St. George's Episcopal Church. After the wedding there was a reception at the home of the bride, No. 3741 Lindell boulevard.

The members of the City Council have been in correspondence with the officials of the different lines coming to Alton for the last three years, trying to induce them to get together and build a new station.

The Circugo and Alton has now given out the news that it will erect the station lisself; that it will be built to be ready for occupancy by next spring, and that the other lines will be invited to come into the Union Station for a small remuneration. The plans for the new station are finished, and call for a fine structure to cost about \$20.00. The members of the City Council will grant any concessions the Chicago and Alton may wish to further the work of the new station.

From statements made Friday afternoon by Fresident C. H. Venner of the Boston Waterworks Company, it will be seen that the city of Alton is powerless to call for sids for a new water contract. The fear that the East St. Louis water supply would be contaminated with the opening of the big Madison sewer, now in course of construction, has resulted in investigations on the part of several of the difference of both Madison and East St. Louis, and it is stated on their authority that the sewer will not affect the purity of the East St. Louis water supply.

The Madison sewer, which, it is expected, will be completed by spring, will be the largest on the East Side. It has been built large enough to accommodate towns three times the size of the combined Tri-Cities. This will bring a near revenue to Madison, and the citizens will be satisfied with the expected topping of this sewer by the large namufacturing plants in the Tri-Cities. This will bring a near revenue to Madison, and the citizens will be satisfied with the expenditure of the large sum of money necessary for the completion of the project.

The outlet for the sewer has been completed and is just above the Merchants bridge. It was built so low as to be submersed in low water. The engineers who drew the plans for the sawer considered carefully the danger of contaminating the water supply of East St. Louis, and announced that there would be less contamination when the new sewer was in use than there is now.
